

Bitumen 60/70 grade

Product Data Sheet

Description

Specifically for road constructions, Liquid Products like prime coat, tack coat, Polymer Modified Bitumen and Water proofing membranes.

Physical Properties

Appearance	Dark black viscous liquid
Odor	Characteristic asphaltic - especially when hot

Specifications

Conform to ASTM D94699/	
Product Type	BITUMEN 60/70
Product Code Name	WOQOD BITUMEN 60/70

Major Tests

	Method	Min	Max
Penetration, at 25°C (77°F), 100 gram, 5 sec	D 5	60	70
Ductility @ 25°C	D 113	100	-
Water by Distillation volume%	D 95	0.00	-
Flash point, °C	D 92	270	-
Solubility in trichloroethylene, %	D 2042	99.5	-

Storage Allowable Temperature Ambient to 140°C.

Application Temperatures 130°C to 140°C

Storage and Handling

Before being filled, tanks should be examined for possible contaminants.

Product Quality

To ensure quality its duly tested by certified third party laboratory to make sure the product meet specifications and delivered to you both on spec and on time.
