Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410, "Review of Interim Financial statements performed by the Independent Auditor of the Entity". A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

The Group uses the following hierarchy for determining and disclosing the fair value of financial Instruments by valuation technique.

Level 1: Quoted prices (unadjusted) prices in active markets for identical assets or liabilities that the Group can access at the measurement date;

Level 2: Inputs other than quoted prices included within level 1 that are observable for the assets of liability, either directly or indirectly; and
